A CAMPUS REPOSITORY

INSIDE OUT: SHARING OER WITH THE WORLD

INSIDE IN: SHARING AMONG FACULTIES

A CAMPUS REPOSITORY

OBJECTIVES
- Facilitate the sharing of learning materials on subjects that are taught on different faculties e.g. research skills, mathematics etc., to benefit from the work that has been done by others.
- Make the lecturers comfortable to share their own learning objects.
- Make the lecturers comfortable with the practice of using learning materials which have been developed by colleagues from another institution.
- Experience the technical and metadata issues that are important for an open repository.

SELECTING A PLATFORM AND METADATA-FIELDS

UPLOADING OER ON THE PLATFORM

EVALUATING THE PROCESS

- Is the inside-in option a useful step towards an open repository?
- How to motivate lecturers to share their materials and use OER?
- Which organisational and technical issues are important if the campus repository is due to be open in the future?
