ONLINE CONFERENCE PROGRAM AT A GLANCE

The OEGlobal 2021 online conference program is comprised of:

Webinar Presentations
Each online conference day starts with webinars, focused on the UNESCO OER action area of the day and programmed by language.
The webinar has up to five presentations.
Each webinar has its own area for posting webinar recording and engaging the global open education community in asynchronous Q&A, discussion, and sharing of related resources.

Pre-recorded Presentations
Pre-recorded presentations are uploaded in advance of the conference and are available across all five days of the conference. The program for each day of the conference will highlight the pre-recorded presentations related to the UNESCO OER Recommendation action area of the day.
Each pre-recorded presentation has its own area for posting the recording and engaging the community in asynchronous Q&A, discussion, and sharing of related resources.

Asynchronous Interactive Activities
Asynchronous interactive activities focused on the action area of the day.
Interactive activities are short, have a clear purpose, and produce an outcome that contributes to implementation of the UNESCO OER Recommendation.
Each interactive activity has its own area for posting resources and engaging the global open education community in asynchronous dialogue, question and answer, discussion, and sharing of related resources.

Social Activities
Fun, informal social activities that provide a means for connecting people together, bridging culture, and helping participants get to know each other.

Bridging Activities
With moving the In-person Congress portion of the OEGlobal Conference to May 23-25, 2022 the program planning committee will be exploring ideas for how to create continuity between the Online Conference (September 27 – October 1, 2021) and the In-person Congress.
Participants are also encouraged to propose ideas by sending an email to conference@oeglobal.org.
